Education

- **National Institute of Technology, Silchar**

India

Bachelor of Technology - Computer Science and Engineering; GPA: 8.8

2019 - 2023

Skills

- **Programming:**

Advanced - Python, SQL, PL/SQL, System Configurations

- **Solution Design:**

Technical Solution Design, System Integrations, Portfolio Management

- **Project Management:**

Agile Development, Time Management, Risk Assessment

- **Relation Databases:**

RDS, Redshift, Postgres

- **Enterprise Systems:**

Data Modeling, Documentation, Process Optimization

- **Data Visualization:**

Dashboard Development, Requirements Management, Strategic Reporting

Experience

- **ORGANIZATION:** Amazon Web Services

ROLE: Consultant Data Analytics

August 2023 - Present

- **Architecting Technical Solutions:** Design scalable and business-aligned technical solutions tailored to customers portfolio management needs, ensuring high availability and comprehensive documentation.
- **Strategic Consulting:** Providing expert guidance to stakeholders on system integration requirements, facilitating meetings to clarify business requirements and align technical implementation.
- **Troubleshooting and Optimization:** Identifying and resolving technical challenges through systematic testing and configuration management, ensuring seamless operation and adherence to established SLAs.

- **Organization:** Mastercard

ROLE: Software Developer Intern

May 2022 - July 2022

- Developed understanding of enterprise application development at scale, focusing on system integrations

and configuration management.

- Collaborated with cross-functional teams to document requirements and implement technical solutions, earning a Pre-Placement Offer.

- **ORGANISATION:** GEEKSFORGEEKS AND SCALER

ROLE: Content Writer

Freelancing

- Created comprehensive technical documentation and educational articles on complex systems, demonstrating strong written communication skills in English.

- Developed structured documentation for system configurations and technical implementations, available at: <https://Rishiraj-Kalita-Articles-Link>

Projects

○ ENTERPRISE SYSTEM MIGRATION

- **Task:** Executed a comprehensive migration project, transferring data using custom jobs, performing thorough validation and documentation, successfully migrating approximately 5000 process components with detailed technical documentation.

- **Technologies:** System Integration, Data Validation, Process Mapping, Technical Documentation

○ PROCESS AUTOMATION AND TRANSFORMATION

- **Task:** Improved the efficiency and consistency of data pipelines for processing and transforming business information, developing technical solutions that aligned with business requirements and risk management protocols.

- **Technologies:** Workflow Automation, System Configuration, Process Optimization

○ REPORTING SYSTEM TRANSFORMATION

- **Task:** Enhanced business intelligence capabilities by transforming reporting dashboards, modeling data based on different business logic and creating comprehensive documentation for knowledge transfer.

- **Technologies:** Business Intelligence, Data Modeling, Technical Documentation, Strategic Portfolio Visualization

Certifications

- AWS Certified Data Engineer

- AWS Certified Machine Learning Specialist

- AWS Certified Solutions Architect

- AWS Certified AI Practitioner

- Solved more than 1500 algorithmic questions on various competitive coding platforms
